March 5, 2018

Dear Customer,

In response to your inquiry, following is PTCA's statement on the Global Automotive Stakeholder Group's Declarable Substance List (GADSL). This statement applies to steel tube products from all PTC Alliance plants, and to chromium-plated steel products from Enduro Industries.

The list is a composite of regulatory requirements from around the world that affect the automotive industry. It applies only to substances that are expected to be present in a material or part that remains in the vehicle or part at the point of sale.

Based on a review of the 2018 GADSL Version 1 "Global Automotive Declarable Substances List," issued February 1, 2018, PTC Alliance's and Enduro Industries steel products do not contain any of the prohibited substances, nor any of the declarable substances at the listed threshold levels, at the vehicle point of sale.

A handwritten signature in black ink that reads "Terry F. Beckwith".
